RESEARCH PROFILE

Experimental astrophysics PhD candidate at The Ohio State University and National Science Foundation Graduate Research Fellow, working with the Askaryan Radio Array (ARA). Interested in ultra-high energy neutrino astronomy, specifically the construction, simulation, and data analysis of radio-based Antarctic neutrino telescopes.

EDUCATION

The Ohio State University, Columbus, Ohio USA — 2014-2019 (Expected)
Ph.D. in Physics–Advisor: Prof. Amy Connolly
Master of Science in Physics, June 2016

Washington University in St. Louis, St. Louis, Missouri USA — 2010-2014
Bachelor of Arts in Physics, *Cum Laude*–Advisor: Prof. Henric Krawczynski

AWARDS

National Science Foundation Graduate Research Fellowship	2016-2019
APS Divison of Astrophysics Travel Award	2017
OSU Graduate Enrichment Fellowship	2014-2015
WUSTL Undergraudate Physics Research Fellow	Summer 2011

EXPERIENCE

The Ohio State University, Columbus, OH USA — **August 2014 - present**
Ph.D. Student, Ultra-High Energy Neutrino Astrophysics

- Active developer in the simulation, hardware, and analysis efforts in Askaryan Radio Array (ARA) collaboration to detect ultra-high energy, extra-galactic neutrinos.
- Lead and directed the mechanical and electrical systems integration of three new neutrino detecting stations, including the management of a six person team of junior students.
- Built and tested printed circuit boards for megahertz RF signal conditioning and power distribution, monitoring, and control.
- Deployed to Antarctica for five weeks to lead the commissioning and calibration of five neutrino detecting stations; performed rapid, high quality on site assessment of instrument performance.
- Developed new frequency and time-series analysis techniques to analyze radio emission from solar flares in the ARA prototype; this is the first extraterrestrial emission observed by the array.
